

## Panaramix, remote workforce management

From 1st May Fone Logistics has partnered with Panaramix to offer a new, exclusive service to its 3 dealers. The Panaramix application allows businesses to manage their remote workforce from a mobile device. Features include;

### Handset tracking

£10 (per month)

The location of registered handsets can be viewed via the secure portal mapping screen. Devices can be configured for working days and hours as well as update intervals.

### Lone worker solution

£2.50 (per month)

Lone working and a company's 'duty of care' to its employees are the subject of increasing legislation and concern. The Panaramix panic alarm is initiated by a 2 second 'press and hold' on the '5' key on the mobile handset.

### Job Dispatch

£2.50 (per month)

Send job details to users handsets whilst in the field. By taking workload and personnel location into account, managing workload directly with the devices enhances the business, field worker and customer experience.

These are all simple to use and simple to buy, competitively priced at the level of adding a tariff bolt on.

**You will receive 30% of the customers monthly spend, paid to you monthly.**

For example, if a customer takes Handset Tracking with one add on, you will receive £3.75 commission a month. Add 10 of these in a month and you will be receiving £37.50 each month for the length of the customers contracts.
